

L'attività del GIN negli ultimi cinque anni

F.P. Schena

In brief

GIN's activity during the last five years

This letter summarises the main activities of the journal during the last five years. The quality of the journal has been improved and it is now included in the Library of Medicine in Bethesda. Moreover, the journal is listed in the Index Medicus and its articles appear in Medline. I believe that the new Editor-in-chief, Francesca Mallamaci, with her enthusiasm will continue to improve the journal.
